Canister Accessories - Plastic Augers

ONE PIECE AUGER (Integral drive coupling) **components**

For all canisters with the following front flange 101A0491D/101A0493C/101A0498B
rear flange 101A0476A and locking nuts 101A0490A/101A0477A

201A0511B Plastic auger - short drive

201A0512B Plastic auger - L20 drive

201A0513B Plastic auger - L28 drive

An internal component, which spins when the auger turns. Available with or without springs which further agitate material and thump the container sides to knock down stuck material.

Having trouble with a tricky powder or solid pieces? Call 952-906-1539 to get your custom design started today or to place an order for any of our proven concepts listed here.

				SPEC. 1291				
				ASSY-WHEEL D.22.5+SPRINGS				
				PDR0002C				
				SEE TABLE				
				SAPD015D				

Technical drawing of a mechanical assembly. The main view shows a gear with four teeth, mounted on a central shaft. Two springs are attached to the gear's teeth, each at an angle of $27^\circ \pm 2'$ to the vertical. The springs are labeled 'H' and 'X'. A detail view (DET.A) shows a close-up of the spring's end, which is a ring with a threaded section and a diameter labeled 'E.D.'. A note indicates that a soft angle of springs is allowed.

201A8404B

For S234 and S235 Hoppers; spring length 58mm

201A8508E

For S234 and S235 Hoppers; spring length 58mm
